

May is Flea and Tick Disease Awareness Month

As the weather gets warmer and we spend more time doing outdoor activities our pets usually join us. While being outdoors is a welcome pleasure it dramatically increases our pet's exposure to the harmful effects of fleas and ticks. For this reason in May we are providing you exceptional offers on packages of Advantix, Advantage, and Sentinel flea and tick products.

During the month of May if you purchase a 12 month supply of Sentinel you'll get two free. Get 12 months, pay for 10 months. Plus get a \$12.00 mail in rebate.

If you purchase a six month supply of either Advantix or Advantage you'll get two free. Get 6 months, pay for 4 months.

While you're visiting our hospital please take the time to do a Lyme disease risk assessment for your pet. Lyme disease is caused by the deer tick and while Alabama is not consider a high risk state we are nearly surrounded by states that do have a high risk. The risk assessment is free and the peace of mind is priceless. We can test your pet and provide vaccine for their on- going protection.
